

REQ-2022-134 Supplementary material

Table A1. Inclusion criteria for the HaH-based OPAT Registry

General criteria for inclusion in a HaH Unit	
1	Willingness to be treated by this type of care.
2	Availability of telephone communication.
3	Residence within the geographical area of coverage of the Unit.
4	Availability of a caregiver at home.
5	Hygienic conditions of the home and adequate social-family environment.
6	Clinical stability and hemodynamics.
Specific criteria for OPAT	
1	Diagnostic certainty of an infectious process defined by clinical and analytical criteria (with or without microbiological studies).
2	Need to administer antimicrobials intravenously after having ruled out, as inadequate or not recommended, alternative routes of drug administration.
3	Availability of adequate venous access in caliber and location for the type of drug and the expected treatment duration.
4	Level of understanding and adequate collaboration with the patient and the caregiver about the proposed treatment.

HaH, hospital at home; OPAT, outpatient parenteral antibacterial treatment.

Table A2. Unit cost

	Unit cost	Source
